AUDIT RESULT AND COMMENT

**FINANCIAL CLOSE AND REPORTING**

*Condition and Context*

Internal control activities should be selected and developed at various levels to reduce risks of error and/or fraud of the financial statement. The Town did not separate incompatible activities related to financial close and reporting of the financial statement. The failure to establish these internal controls could enable material misstatements to be undetected.

The Clerk-Treasurer compiled and submitted the financial information in the Indiana Gateway for Government Units financial reporting system, which was the source of the Annual Financial Report, without a documented oversight, approval, or review process in place to ensure the accuracy of the information submitted.

*Criteria*

The Indiana State Board of Accounts (SBOA) is required under Indiana Code 5-11-1-27(e) to define the acceptable minimum level of internal control standards. To provide clarifying guidance, the State Examiner compiled the standards contained in the manual, *Uniform Internal Control Standards for Indiana Political Subdivisions*. All political subdivisions subject to audit by SBOA are expected to adhere to these standards. The standards include adequate control activities. According to this manual:

"Control activities are the actions and tools established through policies and procedures that help to detect, prevent, or reduce the identified risks that interfere with the achievement of objectives. Detection activities are designed to identify unfavorable events in a timely manner whereas prevention activities are designed to deter the occurrence of an unfavorable event. Examples of these activities include reconciliations, authorizations, approval processes, performance reviews, and verification processes.

An integral part of the control activity component is segregation of duties. . . .

There is an expectation of segregation of duties. If compensating controls are necessary, documentation should exist to identify both the areas where segregation of duties are not feasible or practical and the compensating controls implemented to mitigate the risk. . . ."
