**FORMS AND OFFICIAL RECORDS**

The State Board of Accounts is empowered to formulate, prescribe and install a uniform system of accounting and reporting in each county, pursuant to IC 5-11-1-2. Other laws have extended this power to cover many other forms and records used in counties.

Where a form is prescribed it must be used, without change, in all counties; however, authority is given the State Board of Accounts to approve alternate forms for a county where required to accommodate their use computerized accounting or where other conditions merit approval.

To obtain approval for use of an alternate form for a computerized office three copies thereof must be submitted to the State Board of Accounts with a letter of request. If the change directly affects another public office, the request should also be signed by the official in that office. Approval of an alternate form restricts its use to the county for which approved and does not extend its use to any other county.

Although the State Board of Accounts prescribes forms, copies of the forms must be purchased from a public printer.

The following forms and records have been prescribed by the State Board of Accounts for use of the County Health Department.
