

Blocking Unwanted Calls

Though our office works diligently to prosecute callers who make illegal telemarketing and scam calls, our efforts alone cannot stop the problem. One solution is to stop intrusive calls before they ever reach your phone.

In June, 2015, the Federal Communication Commission (“FCC”) declared that call-blocking filters are legal if requested by customers. Attorney General Zoeller has joined other Attorneys General and the FCC in encouraging telephone companies that do not currently provide call-blocking service to make it available to customers as soon as possible.

In the meantime, we have compiled a non-exhaustive list of services available today.

NoMoRobo.com

What you need: VoIP telephone service (internet-based telephone service like Vonage, Comcast, MagicJack, etc.) and wireless internet access.

How it works: NoMoRobo uses a Caller-ID blacklist to block known spam callers.

What it costs: There is no charge for non-business users

How to get it: Visit NoMoRobo.com

Potential downside: Phone rings once when a blacklisted number calls, then the call is dropped.

Call Blocker by the Kedlin Company

What you need: An Android smart phone

How it works: Uses a Caller-ID blacklist to block known spam callers.

What it costs: Basic version is free; premium version costs \$2.99 per month.

How to get it: Go to Google App Store and download or visit www.Everycall.us

Potential downside: Cost; Does not work for iPhones.

“Block This Caller” for iPhones

What you need: iPhone, iOS 7 and above.

How it works: Click on “Phone” and “Recents.” Then click the little “i” symbol next to the unwanted call and scroll down to click “Block this Caller.” Future calls from that number will go directly to voicemail.

What it costs: This feature is included on all iPhones, iOS 7 and above.

Potential downside: Does not stop the caller; it just sends the call to voicemail. Does not work for anonymous or blocked calls.

“Call Rejection” for Android Phones

What you need: Wireless phone with Android Operating System

How it works: Feature is controlled through your phone settings, and varies among phone manufacturers and models. Allows you to send a call directly to voicemail without your phone ringing by either rejecting all calls from a number or rejecting private, unknown, or anonymous numbers.

What it costs: Available on Android wireless phones

Potential downside: Doesn’t stop the caller; it just sends the call to voicemail.

Anonymous Call Blocking for AT&T Landline

What you need: AT&T traditional landline phone with Caller ID feature

How it works: When a company/individual places a call to you with a blocked, unknown or anonymous call they will hear a message advising that the number does not accept incoming calls from blocked numbers. The message tells the caller to hang up and unblock the number to complete the call. Your phone never rings unless they call back from an unblocked number.

What it costs: \$10 per month.

Potential downside: Cost; Only applies to blocked or no Caller ID calls.

Call Blocking Gadgets or Devices

Examples: Digitone Call Blocker Plus, Pro Call Blocker Version 2.2, CPR Call Blocker V202

Where to find them: Devices are available for purchase online. Always be cautious when dealing with unknown sellers; look at customer reviews and return policies.

What you need: Most work with landlines, VoIP, DSL and digital voice services. Some may require professional installation.

How they work: Most are programmable using your phone to load numbers you want to block. Blocked calls are disconnected after Caller ID is received.

Cost range: \$40 to \$110

Potential downside: Cost; Mixed consumer reviews. Some report hardware issues and difficulty contacting customer service. Some report the devices are difficult to program or don't work well with US phone system.

Blocking calls via MySprint Account

What you need: Sprint wireless phone and plan

How it works: Block up to 50 unwanted callers by adding the numbers to your rejection list. Blocked numbers can include landlines, toll free numbers and 900 numbers. This list can be edited by accessing your account online through "MySprint". Once a number is added or deleted from the list it could take up to 15 minutes to go into effect.

What it costs: No cost with Sprint wireless plan.

Potential downside: Only blocks up to 50 numbers.

Verizon Wireless Family Base / Usage Controls

What you need: Verizon wireless phone and Verizon Family Base/Usage Controls plan

How it works: Block up to 20 contacts; block calls and messages from domestic and international numbers; block restricted, unavailable or private numbers; restrict calls during a certain time of day.

What it costs: \$5 per month

Potential downside: Cost; Limited to 20 contacts.

MyVerizon--Call and Message Blocking

What you need: Verizon wireless phone and MyVerizon-Call and Message Blocking plan

How it works: Block up to 5 contacts, block calls and text messages

What it costs: No additional cost with applicable Verizon Wireless plan

Potential downside: All blocks expire after 90 days.

"Never Allowed" via T-Mobile

What you need: T-Mobile wireless phone and plan

How it works: Block up to 10 numbers

What it costs: No additional cost with applicable T-Mobile plan

Potential downside: International numbers cannot be added.

Various Call Blocking Options via CenturyLink

What you need: CenturyLink service plans

How it works: Blocks a limited amount of numbers, depending upon option selected. Contact carrier for complete list of options.

What it costs: No additional cost with applicable CenturyLink plan

Potential downside: Number of blocked phone numbers may be limited based on which option you select.
