

## PART 8

### CLASSIFICATION AND DEFINITION OF OBJECT ACCOUNTS

#### CLASSIFICATION OF OBJECT ACCOUNTS

For the purposes of the manual and the prescribed accounting system for Indiana's public schools, the Object Accounts are separated into categories dependent upon their function or general purpose. They are identified by numerical designations related as closely as possible to those used in Financial Accounting for Local and State School Systems, Revised. Some classifications, as presented in Financial Accounting for Local and State School Systems, Revised, have been tailored to meet the special needs of Indiana, with respect to Indiana laws and state reporting requirements.

#### DEFINITION OF OBJECT ACCOUNTS

The objects are defined within each classification or program by the specific purpose which they served. These are identified by account titles basically comparable to those in Financial Accounting for Local and State School Systems, Revised, excepting those instances where greater detail is required because of Indiana laws or state reporting requirements.

#### ACCOUNTING FOR OBJECTS

Each expenditure transaction should be identified with the object category concerned. The following part identifies and describes each of the object classifications which you will be asked to summarize for reporting to the Department of Education.
