CP INSURANCE PERKS

Here are a few benefits that are provided to employees and their families that active participate in Clinton Prairie's insurance. These benefits were rolled out in 2023. Clinton Prairie insurance participants now have access to a Direct Primary Care Clinic that provides all employees & families FREE direct primary care with a convenient location in Frankfort. We encourage all staff who have our insurance coverage to take advantage of this benefit. This is at no additional cost. Basic wellness services are provided by a nurse practitioner. They can write prescriptions, but they must be filled at a regular pharmacy. This is a great way to get basic illness visits for you or your family taken care of the same day (Monday – Friday).

Also available to Clinton Prairie Insurance participants are Imaging and Surgical benefits. The insured must be referred to Kis Imaging or Wellbridge Surgical in order to be covered by our insurance at no cost. Please see important contact information provided below for each facility. If you have any questions regarding these benefits, please reach out to Chad Burdo / cburdo@henriott.com. He is our representative from Henriott.
