- a. If the dealer has plates that have a status of Assigned, Lost, Stolen, Mutilated, or Suspended, they will appear on this screen. If the user has plates in any other status (such as expired, invalid, or revoked), they will not be visible on this screen. If a user needs to take action for a plate not listed on this screen, the user must contact the Auto Dealer Services Division and provide the plate number.
 - i. If you have a pending request related to one of the listed plates, it will appear under the Existing Request column next to the affected plate. While that request is pending, you will not be able to take any new action related to that plate.
 - ii. Select the dropdown menu under the Status Update column next to the plate you wish to update. Select either lost, stolen, or mutilated, as applicable. If you are wanting to replace the plate, select the dropdown menu under the New Request column to indicate what you are requesting. You can request a replacement plate and registration card (or a duplicate if it is an M-plate).
 - iii. Note: A user may request a replacement plate only if the plate is lost, stolen, or mutilated.
 - iv. Note: If a plate's status is already marked Lost, Stolen, or Mutilated, a user is unable to change that status. If a plate has an incorrect status, the user must contact the Auto Dealer Services Division. Also, if a plate has a status of Assigned Cannot Renew or Suspended, it cannot be updated from this screen.
