My name is Christopher Harris, I am a proud and content resident of Lake County. I appreciate the integrity of Lake County officials to open this opportunity for its constituents to participate in Redistricting in Lake County's redistricting, this is what a true Democracy looks like. Earlier this year I had the honor to have been selected by the All IN For Democracy Coalition to serve on the Indiana Citizens Redistricting Commission as an Independent Representative favoring neither political party. If I could briefly summarize the testimony we've heard across the state, Hoosiers want fair competitive elections that also respect communities of interest (COI). Having learned a great deal about redistricting this year, I drafted and humbly submit the executive and legislative maps as an individual and constituent of Lake County.

2020 Lake County FAQs
Lake County's 2020 Population: 498,700
Lake County Legislative Districts: 166,233 persons per Executive District*
Lake County Executive (Commissioner) Districts: 71,243 persons per Legislative District**

Lake County Voting History
2020 Presidential Election Lake County Results 57% D / 42% R
2016 Presidential Election Lake County Results: 61% D / 38% R
2020 Governor Election Lake County Results: 54% D / 45% R
2016 Governor Election Lake County Results 66% D / 33% R

My Mapping Criteria

- Creating Opportunity for Competitive Elections
- Respecting Communities of Interest
- Maps Drawn with 2020 Census Block Group Data
- Maps Drawn with free redistricting software DistrictR.

Proposed Lake County Executive (Commissioner's) Map (PDF & SHP File Attached)
Communities of Interest: North Lake County Legacy Cities, Inner Ring Suburbs (Between I-80/94 & U.S. 30 Lincoln Highway) & Rural/Exurban Communities.

The 2020 Census has revealed that our population in Lake County is now relatively evenly distributed between our urban, suburban and exurban/rural communities.

The proposed executive branch map would provide:
(1) Executive District that leans Democrat (North Lake)
(1) Executive District that leans Republican (Rural/Exurban South Lake)
Executive District (Inner Ring Suburbs) that leaned Democrat by 56%/46.6% based on 2020 votes cast for Governor. This Inner Ring Suburban district could provide the opportunity for a competitive primary and general election race considering this same district in 2016 voted 65%D vs 34%R for Governor of Indiana.

*The proposed map submitted is within 1% of the 166,233 required persons per executive district. This map could achieve greater precision if 2020 precinct level data is utilized.

Proposed Lake County Legislative Map (PDF & SHP File Attached)

Communities of Interest: Deep River/East Lake County Communities, Gary/Calumet Township, Merrillville/Crown Point. Southwest/Rural Lake County, West Lake Central Suburbs, West Little Calumet River Communities. Central/North Hammond-Whiting-East Chicago.

Most of the communities of interest above either have shared histories or have shared economic relationships that should be considered when drafting our new legislative maps.

Based on the 2020 votes cast for Governor of Indiana, This proposed legislative map provides the following:

(3) Competitive Legislative Districts- Difference of votes cast between parties less than 10%.

(2) Legislative Districts that lean Democrat.

(2) Legislative Districts that lean Republican.

*The proposed map submitted is within 1% of the 71,243 required persons per executive district. This map could achieve greater precision if 2020 precinct level data is utilized.

Each proposed map can be analyzed in greater detail via DistrictR -

Proposed Lake County Executive Map - https://districtr.org/plan/86609

Proposed Lake County Legislative Map - https://districtr.org/plan/86894

-Please note that the ideal population levels and seat share analytics illustrated in DistrictR were set for Indiana State House and Senate Districts. Please consider the ideal population levels based on the Lake County FAQ's above.

Lake County owes its constituents fair representation, especially considering that these maps will lead each of our communities into Lake County's Bicentennial decade. Personally, I hope that Lake County serves as an example to the Indiana General Assembly that Hoosiers are capable of playing a critical and meaningful role in a fair redistricting process.
