

Medically FRAIL INFO ON AEHP2

- Managed Care Entities (MCEs) determine if a member is medically frail and sends the information to ICES. This data is populated on AEHP2.
- Medically Frail questions are no longer sent to applicants to complete, therefore workers must directly access AEHP2, Verified SW field to view if a member has been deemed medically frail (please access F1 for screen level help). If the Verified SW field is Yes then the individual has been deemed medically frail.
- The verified date is very important and if this date is greater than a year, it is an indication that the HIP regular categories will form (MARB or MASB). The MCEs re-evaluate members annually to assess if they continue to meet the requirements to be determined medically frail.
