MSH Bulletin

Volume 25, Issue 22 June 1, 2022

Trauma-Informed Peer Support

Peer Support Roles...

- Inspire hope that people can and do recover
- Walk with people on their recovery journeys
- Dispel myths about what it means to have a mental health condition or substance use disorder
- Provide self--help education and link people to tools and resources
- Support people in identifying their goals, hopes and dreams, and creating a roadmap for getting there

Being a Peer Support Means...

- Attending Treatment Team Meetings and Hospital Committee Meetings
- Helping develop and revise policies and procedures
- Protecting consumers' or patients' rights
- Assisting in the mediation of consumer or patient conflicts/ complaints
- Facilitating peer support groups
- Assisting with discharge transition
- Participating in the debriefing process and significant event review
- Supporting cultural change through inclusion of service recipients

Continued on next page...

Being a Peer Support Means...

- Engaging peers in collaborating relationships
- Sharing experiences of recovery
- Assisting peers to manage crisis
- Participating in physical and design changes
- Providing input into program design

Joint Commission Readiness Mitzi Lawson, Performance Improvement

National Patient Safety Goals (NPSG) Chapter

Each year The Joint Commission gathers information about emerging patient safety issues from widely recognized experts and stakeholders. This information is the basis for the National Patient Safety Goals. This information is tailored to specific accredited programs. The information gathered is also used for sentinel event alerts, standards and survey process, performance measures, educational material and Joint Commission Center for Transforming Healthcare projects.

The National Patient Safety Goals that impact Madison State Hospital are listed below:

NPSG.01.01.01 - Use at least two patient identifiers when providing care, treatment, and services.

NPSG.02.03.01 - Report critical results of tests and diagnostic procedures on a timely basis.

NPSG.03.04.01 - Label all medications, medication containers, and other solutions on and off the sterile field in perioperative and other procedural settings.
Note: Medication containers include syringes, medicine cups, and basins.

NPSG.03.05.01 - Reduce the likelihood of patient harm associated with the use of anticoagulant therapy.

Note: This requirement does not apply to routine situations in which short-term prophylactic anticoagulation is used for preventing venous thromboembolism (for example, related to procedures or hospitalization).

NPSG.03.06.01 - Maintain and communicate accurate patient medication information.

NPSG.06.01.01 - Improve the safety of clinical alarm systems.

NPSG.07.01.01 - Comply with either the current Centers for Disease Control and Prevention (CDC) hand hygiene guidelines and/or the current World Health Organization (WHO) hand hygiene guidelines.

NPSG.15.01.01 - Reduce the risk for suicide. Note: EPs 2–7 apply to patients in psychiatric hospitals or patients being evaluated or treated for behavioral health conditions as their primary reason for care. In addition, EPs 3–7 apply to all patients who express suicidal ideation during the course of care.

Reminder to complete your AHRQ Survey this week if you have not taken the time to do so.

Agency for Healthcare Research and Quality

AHRQ SOPs® Hospital Survey

It is time once again to participate in the annual AHRQ Hospital Survey on Patient Safety Culture. The survey is again being distributed via Survey Monkey so that all responses are confidential and do not identify who responded or what your responses are. We ask that each of you please take the time to complete the survey so that we get a good idea of areas for improvement at MSH.

The survey is due back to AHRQ in June. **Please complete the survey no later than Monday, June 13, 2022.** We will be sending reminders throughout this period in hopes that we get as many responses as possible. If you have any questions, please contact **Mitzi Lawson** at **7469**.

Thank you for taking the time to participate in the survey!

SDS Information (Safety Data Sheet) can be found electronically on the MSH Homepage as shown below.

The screenshot shows the Madison State Hospital Intranet homepage. At the top left, there are links for 'HOME' and 'PHONEBOOK'. The main header area features the hospital's name and logo, along with the Indiana Family & Social Services Administration logo. A navigation menu on the right lists various resources, with a red arrow pointing to 'SDS Information'. Below this, a red arrow points to a 'Safety Data Sheet Links' section, which contains a link for 'SDS Data'. A final red arrow points to a search results table.
